SUMMARY

Data Analyst passionate about turning data into meaningful insights and supporting better business decisions. Experienced with Python, SQL, Pandas, Power BI, Tableau, data cleaning, EDA, and data visualization. Developed skills in analyzing data, identifying trends, and presenting clear business insights through DEPI and practical projects, with exposure to Generative AI through an internship at CIB.

EDUCATION

Faculty of Computers and Data Science | 2025 – 2029
Alexandria University | GPA: 3.00 / 4.00

EXPERIENCE

Generative AI Intern | CIB (Commercial International Bank) | Summer 2026

- Learned about Generative AI and its practical applications.
- Explored how AI can be used in banking and financial services.
- Developed analytical, problem-solving, and technical skills.

PROJECTS

Retail Sales Analysis | Python, Pandas, Matplotlib, Seaborn | DEPI – Data Analysis Track, August 2026

- Cleaned and explored retail sales data: missing values, duplicates, data types, and outliers.
- Engineered features including Profit Margin, Shipping Days, Discount Level, and Sales Performance Category.
- Ran correlation and trend analysis and built 14+ business-focused visualizations.
- Analyzed sales, profitability, customer behavior, discounts, and shipping to generate actionable insights.

Central Superstore Data Warehouse & Analytics | SQL Server, Star Schema, Tableau

- Designed a SQL Server data warehouse with a Staging, Bronze, Silver, and Gold pipeline and a star schema (fact and dimension tables).
- Wrote advanced SQL queries, KPI views, and stored procedures, and optimized query performance.
- Built Tableau dashboards on the same data to visualize sales, profit, and key business KPIs.
